Group 8

Introduction

The website made for this project is the official website of the (fictitious) University of Students (UoS), a highly successful university based in Queensland, Australia seeking to upgrade their online presence to catch up with the modern times. The new and improved website required pages for home and general, news, research, partners, study, contact details, and about the university.

Motivation

Our team picked this option as we believe it is the clearest way to demonstrate our combined knowledge of HTML, CSS, and JavaScript. Picking an official university website provided an easy way to distribute pages, dividing content into pages in a way that makes sense, and linking those pages all together in a logical manor.

According to the assessment outline, we were limited to only 40% ‘new’ CSS, HTML, and JavaScript not covered in class. Due to the extensive listing of all CSS properties in the additional learning resources for week 7, as well as the lack of proper introduction to JavaScript in class, we have let these two aspects be unrestricted. As for HTML tags, most of them have been discussed in class, leaving only a small handful of tags unaccounted for; less than 40%. For these reasons, we have guaranteed that our website code has not exceeded 40% new content and remains within the guidelines of the assessment outline.

Contribution Credit

Page name		Developer(s)
Home	index.html	Abhiman Bhattarai, TJ Woods, Binit Shilpakar
Study	pages/study.html	Abhiman Bhattarai
Research	pages/research.html	TJ Woods
About Us	pages/about.html	Binit Shilpakar
Partners	pages/partners.html	Binit Shilpakar
News	pages/news.html	TJ Woods
Contact	pages/contact.html	Abhiman Bhattarai
OTHER	Includes images, JS, CSS, and the ‘component’ HTML files	All contributed to styling, colour schemes, and animation production.

NOTE: the website may have links to pages that do not exist. This is because they are outside the scope of this assessment but were relevant to the scenario. These non-existent pages include but are not limited to: certain news articles, research areas, and study options pages.
